

»MADAMFO«

THE
GHANAIAN
WORD
FOR FRIEND

Madamfo Ghana – helping people to help themselves – is our guiding principle with which we realise our projects, and that is hand in hand with the inhabitants of the rural villages.

This is the key to develop and implement projects successfully in the long term. All relevant groups participate in developing the project: the inhabitants – as the target group of the project, the government – represented by the district assembly, unit committee and the District Chief Executive of the region and the and the employees of Madamfo Ghana, which carry out the project hand in hand with the inhabitants.

The people are not being told what they need or what they need to improve. We find solutions – jointly, at site.

Improving the livelihoods of the people and being independent from Madamfo Ghana after the project is established are the main goals of any project that is carried out by our Foundation.

The engagement, experience, expertise and reliability of our employees at site – that are also familiar with the cultural backgrounds and languages of the people – are another key to our success.

Bettina Landgrafe founded Madamfo Ghana almost 20 years ago and stands for the project with her Ghanaian colleagues Victor Manu and Enock Sunday.
