JULY-DECEMBER 2019

## HELPING PEOPLE TO HELP THEMSELVES: SOW THE FUTURE, HARVEST PROSPECTS

Since the early 1990s, Ghana has lost more than 30% of its forests - with severe consequences for the people. From desertification and a loss of income to the radicalization of the local population by islamist extremists, all this leads to the destruction of the habitat.

**OUR GOAL IS TO PLANT OVER 50,000 TREES WITH YOUR HELP.**

Our Christmas Project counters the rural exodus of the young population by creating growth and prospects, so that the young people stay.

**THE PROJECT BUDGET IS 60,000 EURO,  
WHICH EQUALS 6 GHANAIAN CEDIS OR  
1 EURO PER SEEDLING.**

THE CULTIVATED TROPICAL TIMBER SUCH AS TEAK,  
PALISANDER AND MAHOGANY, MANGO,  
CINNAMOMUM CASSIA AND EUKALYPTUS HELP  
TO CREATE NEW PROSPECTS OF INCOME.

**DONATE  
NOW**

WITH YOUR DONATION,  
YOU CAN PROVIDE ONGOING  
SUPPORT FOR NEW GROWTH  
AND PROSPECTIVES TO STAY.

## A JOINT PROJECT WITH SUSTAINABLE PROSPECTS

Children and teenager of selected schools and educational institutions will be involved in this reforestation project; as will their families, the local forest industry and the most important decision-makers on site. That creates cohesion.

The joint and collaborative character of the project has an additional effect: it prevents people from the feeling of being left behind. That deprives local islamist extremists of their breeding ground.

### PROSPECTIVE 1: REFORESTATION

To combat deforestation and rural exodus

### PROSPECTIVE 2: EDUCATION OFFENSIVE

To raise awareness for climate and environment protection

### PROSPECTIVE 3: GENERATION OF INCOME

To develop new sources of income for girls and young women - in connection with our support project for the women of the Kumasi Central Market:  
<https://madamfo-ghana.de/projekt/nothilfe-fuer-die-traegerinnen-in-kumansi/>

### PROSPECTIVE 4: ACTIVE ENVIRONMENT PROTECTION

To increase the forest areas in the long term and to increase the oxygen production

SUPPORT OUR CHRISTMAS PROJECT WITH 1€ PER TREE.

## ABONO SCHOOL WASH-PROJECT

The WASH-Project for the the Abono School at Bosomtwe District in the Ashanti Region of Ghana means clean drinking water, new sanitary facilities and more hygiene for 252 pupils. Due to their new knowledge, the pupils become role-models not only within their families, but also within their entire social environment. They become agents of change in their communities and will stick to their knowledge once they become parents and pass it on to their own children.

Right now, there is not enough drinking water and there's a lack of acceptable sanitary facilities. A small pit latrine covered with corrugated iron is used as the school's sanitary facility. Due to the heat and the unbearable smell, some pupils take off their shirts before they enter. It is even worse for the girls, because they stay away from school during their menstruation, since there are no options for their monthly hygiene. Due to the lack of hygiene, parasitic infections and diarrhoeal diseases are spreading – which leads to high absentism from school.

## PROJECT GOALS:

- Improve the standard of health and education by building suitably sanitary facilities.
- Access to clean drinking water by building a mechanised water supply system with storage tanks.

The main pillars of the project are awareness, capacity building and participation at all levels. The sustainability of the project and the disseminator effect of the project assure the improvement of the overall situation.

**DONATE  
NOW**

**STATUS: IN PLANNING, COSTS: APPROX. 16,000 €**

## FARMPROJECT FOR FOOD PRODUCTION

We would love to make the children in Ghana less dependent on food donations and therefor founded the farm project. In the Ashanti Region, there are ca. 6,000 square meters of fertile farmland at our disposal. We would like to grow corn, cassava, plantains and beans. With the yield of our first harvest in September 2019, we were able to support our School Feeding Programme.

With only 10 € per month and parcel (12x5m), we are able to cover the entire costs, such as sewing, preparing the soil, care, harvesting and transportation. The land is harvested and replanted twice a year. We expect the next harvest in February 2020.

Only locals are responsible for the care, which is also why you do not only create food, but also jobs with your sponsorship.

WERE WE ABLE  
TO CATCH YOUR  
ATTENTION WITH THIS  
SUSTAINABLE PROJECT?  
BECOME A SPONSOR  
FOR A PARCEL NOW

DONATE  
NOW

**COSTS: 10€ PER MONTH AND PER PARCEL**

## CHICKEN FARM IN BRODI VILLAGE

Helping people to help themselves – this is where our project “Chicken farm in Brodi village” comes in.

We were able to buy hens and some roosters. So now we can produce eggs at lower costs and, at the same time, realize a self-help project in the village.

This engagement enables self-supply with eggs and occasionally chicken meat. This approach is also very reasonable from a nutritional point of view.

DONATE  
NOW

**COSTS: PER ROOSTER 12€, PER CHICKEN 10€,  
50€ PER 50KG CHICKEN FEED**

## BRODI PRIMARY SCHOOL

The village of Brodi is located in the Tain District in the Brong Ahafo Region of Ghana. It is about 35 kilometers from Nsawkaw, the district's capital, and the population of Brodi is about 13,000 people. The main activity is agriculture. Brodi has both public and private schools with nursery schools, primary schools, junior high and senior high schools. The total number of pupils and students is about 2,300.

The Roman Catholic primary school in Brodi, which was supported by Madamfo Ghana with school equipment and throughout the construction of the nursery school, was badly damaged by heavy rainfall. The school block, which was built 25 years ago by members of the Roman Catholic Church of Brodi, collapsed on 14 June 2019 due to heavy rain and storms. More than 125 school children are now without a school building. Teaching and learning takes place under trees.

**THE MAIN AIM OF THE PROJECT IS TO REBUILD AND RECONSTRUCT THE THREE CLASSROOMS FOR THE SCHOOL AND A TEACHER'S OFFICE.**

The land on which the school block will be built belongs to the school and is therefore free of unforeseen land disputes. Once the project is completed, the school will be owned by the community, the district school council and the district assembly.

In addition to that, the community is ready and willing to provide any type of labour, especially unskilled labour, at any level of the project when needed.

**STATUS: IN PLANNING  
COSTS: 25,000 EURO**

## HOW TO HELP:

- You can support our Christmas Project with 1€ per tree.
- You can donate and support our farming programme. With 10€ per month, you can ‚adopt‘ 10 sqm of fertile farmland.
- You can buy a chicken for 10€ or a feed bag of chicken feed for 50€ for our chicken farm.
- Become a sponsor of a ‚fisher child‘. You can support a child that we saved from slavery within our Programme against Child Trafficking at Lake Volta with 50€.
- You can help us to cover the running costs of the children’s home. You can buy a board game for the children for only 15€, a school bag for 25€ and a book for 8€.
- You can support the primary care for a newborn of the Kayayei with only 10€.
- 50€ enable us to send a nurse to the Kayayei and their children.
- 300€ for a three-wheeled wheelchair, that helps a disabled child to get to school.

- With 400€ we are able to provide medical training and information on family planning for an entire village.
- 5,000€ enable us to build an automated well for an entire village and to ensure the water supply of the inhabitants.
- 25,000€ enable us to build an entire nursery school.

Of course, there are numerous additional projects and possibilities to support us. For more information, please visit our homepage - [www.madamfo-ghana.de](http://www.madamfo-ghana.de)
